1. Read the passage given below and complete the sentences that follow by choosing the most appropriate answers from the given options : $1 \times 5 = 5$

It's a common sight to see children racing down hills, playing in the rain, chasing each other through fields, or walking through the meadows to school. Rarely would you come across a child howling because of a scraped knee or a hurt elbow. Kids grow into strong, sturdy people with lots of physical energy and stamina. I attribute this glory of well-being to the region's open spaces and grounds that allow us to grow up in the midst of nature.

I have noticed how sluggish the 'healthy' urban children are, especially in comparison to children in my village. Children in cities look incapable of climbing even one small hill – something that would be a child's play for many of us.

When I ask most people at these felicitation parties what their kids are doing, they proudly tell me how busy these kids are with their studies, tuitions and TV ! It makes me wonder if after all this, if they have any time at all to play. Video games and computer games hardly classify as play or sport.

We have all heard that all work and no play makes Jack a dull boy or Jill a dull girl. This isn't a maxim but a reality. I urge you all to look at play not as a waste of time but as a necessity. Play encourages children to participate, socialize, cooperate and team up. It allows them to experiment – toughening them up physically and mentally.

Mary Kom – Olympic Medalist

2. Read the passage given below and complete the sentences that follow by choosing the most appropriate answers from the given options : $1 \times 5 = 5$

Between May and July, Govind Rawat applies for long leave from his office in Dehradun and heads for his village above Joshimath near the temple town of Badrinath in Uttarakhand Himalayas. There, he joins other villagers on a trek to the high altitude bugyals (alpine meadows) situated almost 5,000 meters above sea level. His quest, like that of many others who are fanning out to meadows in different parts of the Himalayas during this time of the year, is for a thin, caterpillar like fungus which is locally known as keera jari (insect herb).

The worm-like appearance belies the importance of this fungus, scientifically known as *Cordyceps sinensis* and highly valued as a tremendous energy booster in the traditional medicinal systems of China, Nepal and India. For Rawat and his co-villagers, it is worth its weight in gold, if not more. One kilogram can fetch at least ₹ 2.5 lakh. But it is very difficult to locate, since it appears as any other twig sprouting from the ground.

The importance of the herb in Chinese medicine – ancient records suggest that royal physicians of the Ming dynasty were aware of this wonder herb and used it to develop powerful medicines – has ensured that there is a surging demand for it in China. The Chinese are by far, the biggest consumers of Cordyceps. They procure a lot of it from Tibet besides importing it from Bhutan, Nepal and India.

- (a) Mr. Rawat takes leave from his office every summer to _____ .
- (i) visit Joshimath
 - (ii) visit Badrinath, the holy town
 - (iii) go on a trek to the high altitude bugyals
 - (iv) climb mountains
- (b) Many villagers rush to mountain meadows in search of _____ .
- (i) gold
 - (ii) caterpillars
 - (iii) grass
 - (iv) keera jari

- (c) Each season the villagers climb up the high altitudes in the months of _____.
- (i) April, May and June
 - (ii) May, June and July
 - (iii) April, June and July
 - (iv) None of the above
- (d) The Chinese attach great importance to keera jari for _____.
- (i) its energy enriching qualities
 - (ii) it is very precious
 - (iii) it is a rare medicine
 - (iv) All of the above
- (e) China imports this medicinal herb from _____.
- (i) Tibet, India and Nepal
 - (ii) Nepal, Bhutan and Tibet
 - (iii) Bhutan, India and Nepal
 - (iv) All of the above
3. Read the passage given below and answer the questions that follow. $1 \times 5 = 5$
- My grandmother and I were good friends. My parents left me with her when they went to live in the city and we were constantly together. She used to wake me up in the morning and get me ready for school. She said her morning prayer in a monotonous singsong while she bathed and dressed me in the hope that I would listen and get to know it by heart; I listened because I loved her voice but never bothered to learn it. Then she would fetch my wooden slate which she had already washed and plastered with yellow chalk, a tiny earthen ink-pot and a red pen, tie them all in a bundle and hand it to me. After a breakfast of a thick, stale chapati with a little butter and sugar spread on it, we went to school. She carried several stale chapatis with her for the village dogs.

My grandmother always went to school with me because the school was attached to the temple. The priest taught us the alphabet and the morning prayer. While the children sat in rows on either side of the verandah singing the alphabet or the prayer in a chorus, my grandmother sat inside reading the scriptures. When we had both finished, we would walk back together.

4. Read the poem given below and answer the questions that follow : $1 \times 5 = 5$

To Blossoms

Fair pledges of fruitful tree,
Why do ye fall so fast ?
Your date is not yet past,
But you may stay yet here awhile
To blush and gently smile,
And go at last.
What ! were ye born to be
An hour or half's delight,
And so to bid good night ?
'Twas pity Nature brought ye forth

Merely to show your worth
And lose you quite.
But you are lovely leaves, where we
May read how soon things have
Their end, though ne'er so brave :
And after they have shown their pride.
Like you awhile, they glide
Into the grave.

Robert Herrick

- (a) Why does the poet feel sad ?
- (b) Explain the phrase : 'An hour or half's delight' in the second stanza.
- (c) What do lovely leaves here stand for ?
- (d) What is the rhyme scheme in stanza 1 ?
- (e) What thought does the poet console himself with ?
