At home, water is necessary for drinking, cooking food, washing, cleaning, and gardening. Animals too need water to drink and to wash themselves. In agriculture water is needed for growing food items like rice, wheat, vegetables, fruits, coffee, tea and sugarcane.

OR

Unlike any other natural resources, water cannot be replaced by anything else. To quench your thirst or to grow a plant, there is no replacement for water. In other cases, one natural resource can replace another, but nothing can replace water.
